

Derek Prieur

Web Developer

👤 Profile

I'm Derek Prieur, a full-stack React developer with three years experience, specializing in creating scalable, responsive, and user-friendly applications using React.js, Next.js and Node.js. Basically, I like building cool stuff with cool people.

If there is one thing you will learn about me, it's that I am a deeply committed engineer & person. It's rare to find a day when I'm not knee-deep in a project or learning a new concept. I may not be the best in every category, but I know for sure there aren't many who match my everyday work ethic.

📁 Employment History

Full-Stack Developer, Remote

February 2023 — August 2023

- Graduated from JSM Masterclass Experience - an Immersive 6 month Web Development Program with a 0.78% acceptance rate.
- Lead a team of 5 developers across multiple timezones
- Successfully delivered 3 separate products across two quarters and 14 sprints, utilising the Agile framework and project planning.
- Steered the development towards quarterly goals by adapting to industry standards and implementing the appropriate technologies.
- Established an entire System Architecture for multiple projects, resulting in an end-to-end system with complete CI/CD workflows.
- Utilized industry standard technologies, with key ones being React, Next.js, Node.js, Redux and others.

Web Development Student

April 2022 — Present

- Consistent and systematic approach to learning resulting in 1200+ YTD contributions on GitHub.
- Large focus on understanding fundamental concepts and problem solving.
- Extensive experience working with React, Next.js, Node.js, CSS, & Redux across dozens of projects, ranging in size and complexity.
- Adamant about maintaining a 95%+ SEO score on both desktop and mobile platforms on all of my projects, utilising server-side rendering, improving accessibility and being conscious about overall project bundle size.
- Established a 98% code coverage on some of my projects, with well-written tests using the Jest suite.

QA Analyst at OptionSoft Technologies, Remote

2018 — Present
